

DON'T SUFFER WITH NEURALGIA

Musterole Gives Delicious Comfort.

When those sharp pains go shooting through your head, when your skull seems as if it would split, just rub a little MUSTEROLE on the temples and neck. It draws out the inflammation, soothes away the pain—gives quick relief.

MUSTEROLE is a clean, white ointment, made with oil of mustard. Better than a mustard plaster and does not blister.

Doctors and nurses frankly recommend MUSTEROLE for Sore Throat, Bronchitis, Croup, Sore Neck, Asthma, Neuralgia, Congestion, Pleurisy, Rheumatism, Lumbago, Pains and Aches of the Back or Joints, Sprains, Sore Muscles, Bruises, Chills, Frosted Feet—Colds of the Chest (it often prevents pneumonia).

At your druggist's, in 25c and 50c jars, and a special large hospital size for \$2.50.

Be sure you get the genuine MUSTEROLE. Refuse imitations—ask what you ask for. The Musterole Company, Cleveland, Ohio.

MUSTEROLE

NEW MEXICO MINES REVIEWED BY THE MINING WORLD

Metal Producers of State Described and Their Outputs Listed in Leading Mineral Publication.

The Mining and Engineering World, a leading publication in the mining field, issues in its first number for the new year a comprehensive resume of the products and developments of New Mexico mines in 1914.

After quoting the production figures given in the geological survey reports, the article continues:

The Mogollon district, which in 1913 yielded \$619,884 in gold and 1,399,775 ounces of silver, showed a small increase for 1914. Considerable metallic gold and silver were marketed from Pinos Altos, in addition to ores shipped. The output of the gold and silver bearing siliceous and copper ores of the Lordsburg district increased. The Whitehead district, Lincoln county, continued to produce gold bullion. The Elkhorn, town district, Colfax county, remained the principal placer producing district. The Oro Grande district, in Otero county, and the San Pedro district, Santa Fe county, contributed gold and silver in copper ores. The new 100-ton cyanide mill in the reopened Bland district, Sandoval county, continued to produce silver, gold bullion after September, and gold-silver bullion was produced at the cyanidation plants in the revived Red River district, Taos county.

The greater part of the output of copper comes from the operations of the Chino Copper company, which is mining a low-grade deposit at Santa Rita by steam shafts. This ore is concentrated at Hurley in a wet-concentration plant of five sections, where an average of 5,322 tons a day was treated in 1913, the yield of copper for that year being 53,170,145 pounds. In 1914 the production of this company began to show material increases over corresponding periods in 1913, being 17,385,621 pounds for the first quarter and 17,932,571 pounds for the second quarter, but owing to the curtailment of product necessitated by the condition of the copper market on account of the war in Europe, the production for the third quarter was only 11,491,120 pounds, and the estimated production for the year 45,322,000 pounds. The Lordsburg district continued to produce a considerable quantity of copper, and the Oro Grande and San Pedro districts also contributed to the production. In preparation for handling the copper ores developed in the Burro Mountain district, the Burro Mountain Copper company, complete an experimental mill during the year for determining the process to be used in the proposed 1,000-ton concentration plant and made experiments with the flotation process.

The lead output of New Mexico comes chiefly from the crude ore from the Cook's Peak district, Luna county, and from lead ore and concentrates from the Magdalena district, Socorro county. Several shipments were made from the Organ district, Dona Ana county, formerly an important producer of lead.

The mines producing zinc in 1914 in New Mexico were in the Magdalena district, Socorro county; the Cook's Peak district, Luna county; and the Haver and Pinos Altos districts, Grant county. The Magdalena district was the most productive, the output being zinc carbonate and zinc sulphide ores and zinc sulphide concentrates. Zinc carbonate and zinc sulphide ores were shipped from Cook's Peak and zinc carbonate from Haver. Important development and construction work was done at Magdalena, Haver and Pinos Altos. The production of zinc ore and concentrates from New Mexico was 24,485 tons of 41.95 per cent zinc, compared with 25,734 tons of 37.8 per cent zinc in 1913.

For the past several months the Bonney Mining company of Lordsburg has been shipping three carloads of ore per week, averaging \$19 per ton—three-fifths of the value being in gold—to the Copper Queen at

Douglas. At the present time the company is erecting practically a new mill. The property is now well equipped with a 6-drill Sullivan compressor, 100 horse-power boiler, hoisting engine and equipment to sink to a depth of 500 feet. Inclement weather interfered with ore shipments somewhat during December.

Miners and prospectors are evincing great interest in a strike of free gold just made in the White Signal district near Silver City. A large body of gold-bearing porphyry has been uncovered near Signal Peak. Assays run from 20 to 30 ounces in gold. R. Spencer and F. Hedrick, who have been operating in this district for some time, have uncovered a persistent ore about assaying very high in gold values. Several specimens of the high-grade show a grade of ore not often met with in this district, and show finely disseminated free gold all through the gangue. The gold is of a dark, yellow color and seemingly of great purity. The new strike caused a revival of activity in the district. The entire district is a network of porphyry dikes and their accompanying vein matter. The opening up of ore at depth is expected to have, and no doubt will have, a wholesome effect on the mining activities of this portion of the Burro mountains.

BURRO MOUNTAIN PLANT

IMPROVEMENTS DESCRIBED.
At the property of the Burro Mountain Copper company, near Silver City, N. M., the Phelps-Dodge company installed a new testing plant for the purpose of obtaining the data necessary for designing combination flotation, concentration and leaching plant. The equipment included an Allis-Chalmers jaw crusher and rolls, belt and bucket elevator, a 50-ton Hardinge conical mill for regrinding; a 20 to 75-ton unit of the Minerals Separation company's system; and Wilfley concentrating tables.

In October the company put a force of men at work on the site for a 1,000-ton mill but work on the mill proper was deferred until a later date after the method of reduction has been decided upon.

The same policy of running a test mill before entering upon further improvement has also been adopted by the Copper Queen Mining company at Bisbee, Ariz.

CURRY COUNTY CLAIMS LARGEST GRAIN YIELD

Clovis, N. M., Jan. 5.—That Curry county is the largest grain producer in the state is the claim advanced by the Clovis Journal and the Melrose Dailyman-Farmer.

Over 40 cars of wheat have been shipped from the Clovis station this fall and winter and many Clovis wheat buyers have shipped from Farwell, Texas, when possible, on account of the better Texas freight rates. Broom corn shipments have been heavy and the other grain crops which are just now being threshed are beginning to move.

From Melrose 27 cars of wheat have been shipped and there are about that many more ready for shipment. Broom corn shipments have been large, but so far cattle shipments are ahead of them, there having been 34 cars of stock sent from Melrose in the present season.

About 140 cars of maize and kafir corn are in readiness for shipment.

The total value of the 149 cars shipped since the first of the year is placed at \$155,000 with the heaviest shipments yet to come. It is estimated that this section of Curry county will average \$20,000 per month for the twelve months of the year, and during November this average was exceeded by more than \$1,000, not counting the express shipments of cream, poultry, eggs, butter, etc.

EAT LESS MEAT IF BACK HURTS

Take a Glass of Sals to Flush Kidneys If Bladder Bothers You.

Eating meat regularly eventually produces kidney trouble in some form or other, says a well-known authority, because the uric acid in meat excites the kidneys; they clog up and cause all sorts of distress, particularly backache and misery in the kidney region; rheumatic twinges, severe headaches, acid stomach, constipation, torpid liver, sleeplessness, bladder and urinary irritation.

The moment your back hurts or kidneys aren't acting right, or if bladder bothers you, get about four ounces of Jad Sals from any good pharmacy; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush clogged kidneys and stimulate them to normal activity; also to neutralize the acids in the urine so it no longer irritates, thus ending bladder disorders.

Jad Sals cannot injure anyone; makes a delightful effervescent lithia-water drink which millions of men and women take now and then to keep the kidneys and urinary organs clean, thus avoiding serious kidney disease.

GREEN TAG SALE!

WE NEED NO INTRODUCTION TO THE MEN OF ALBUQUERQUE—WE NEED NOT TELL YOU ABOUT THE STYLES, THE MATERIAL, THE WORKMANSHIP, ETC., OF OUR SUITS AND OVERCOATS—WE NEED NOT TELL YOU THAT WE NEVER BUY CHEAP, SHODDY MERCHANDISE. IT'S A CONCEDED FACT THAT IF A MAN WANTS TO BUY HIGH CLASS CLOTHING; CLOTHING THAT'S MADE TO GIVE HIM HIS MONEY'S WORTH; HIS THOUGHTS TURN TO HART-SCHAFFNER & MARX AND HIS STEPS TAKE HIM TO OUR STORE, WHETHER NOT. WE NEED NOT TELL YOU THAT CONDITIONS HAVE BEEN BAD THIS FALL, FOR YOU KNOW IT AS WELL AS WE DO, HENCE WE ARE ELIMINATING ALL IDEA OF PROFITS—READ THE REDUCTION IN PRICES:

Hart, Schaffner & Marx Suits and Overcoats

Worth \$24, \$25, \$28 and \$30, Green Tagged \$18.90
We have a large stock of both Suits and Overcoats, and sizes are pretty good.
HERE IS YOUR CHANCE

All-Wool Guaranteed Suits and Overcoats

All made by responsible manufacturers and sold at \$16.50, \$18.00 and \$20.00. YOUR CHOICE ONLY \$14.90

Other Dependable Suits and Overcoats

Sold regularly at \$14.00, \$15.00 and \$17.00
YOUR CHOICE ONLY \$10.90

We Advise Early Buying Before the Stock Gets Low

BOYS' SUITS WORTH \$6 to \$8	\$4.90	MEN'S \$4.00 TROUSERS	\$2.90
BOYS' OVERCOATS AND REEFERS WORTH \$6.50	\$3.90	MEN'S \$5.50 TROUSERS	\$3.90
